Skills

- **Frontend & Backend:** React.js, Next.js, JavaScript (ES6+), Tailwind CSS, Node.js, Express.js, REST APIs
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Dev Tools & Deployment:** Git, GitHub, NPM, Vercel, Postman

Education

NATIONAL UNIVERSITY OF MODERN LANGUAGES **Islamabad, Pakistan**
Bachelors of Science in Software Engineering 2021 - 2025

Professional Experience

TailorEase **Islamabad, Pakistan**
TailorEase is an innovative startup platform linking customers with expert tailors for custom outfits, integrating 3D virtual try-ons, AI-powered support, and real-time order tracking.

Frontend Developer (Next.js, React.js, Firebase) **Jan 2025 – July 2025**

- Built a full-stack custom tailoring platform connecting users with tailors for personalized orders.
- Designed and implemented interactive modules including a 3D try-on system, AI-powered chatbot, and wallet-based payout mechanism to enhance user experience and platform engagement.
- Used Firebase Authentication, Firestore, and Cloud Functions for secure, scalable backend services.
- Developed dashboards with analytics for both customers and tailors using dynamic Next.js components.
- Implemented role-based access control, real-time updates, advanced filters, and a fully responsive UI using Tailwind CSS.

Brauch Solutions **Islamabad, Pakistan**
Brauch Solutions is a service-based startup that provides innovative IT and comprehensive web development solutions, delivering client-focused digital products and scalable web applications across various industries.

Full Stack Developer Intern (MERN, WordPress) **Aug 2024 – Nov 2024**

- Developed and customized diverse client websites using WordPress and PHP, implementing responsive designs, custom plugins, and performance improvements to meet specific client requirements.
- Worked on full-stack web projects using the MERN stack, building dynamic features, optimizing complex APIs, and continuously improving overall application scalability and maintainability.
- Assisted in database management, authentication setup, and backend logic using Node.js and MongoDB, ensuring secure data handling, efficient server operations, and overall system reliability throughout.
- Collaborated with design and development teams to integrate APIs, resolve technical issues, and deliver visually consistent, user-friendly interfaces and seamless digital user experiences.
- Supported deployment processes using platforms like cPanel, Vercel, and Firebase, ensuring smooth website delivery, proper configuration, and functionality across multiple client projects.

Projects

WhatChat | Real-Time Chat App **Islamabad, Pakistan**
A full-stack real-time chat application inspired by WhatsApp, developed as part of a personal learning.

Personal Full-Stack Development Project **Sep 2025**

- Built a full-featured real-time chat app using MongoDB, Express.js, React.js, and Node.js, enabling seamless communication across devices with optimized performance and data handling.
- Implemented Socket.IO for one-to-one real-time messaging, typing indicators, and online/offline status, ensuring synchronization and delivering responsive, uninterrupted messaging experiences for users.
- Developed secure JWT-based authentication and managed sessions with cookies, applying encryption, validation, and cookie management best practices to safeguard data and maintain user sessions.
- Integrated Cloudinary for image and file uploads and followed a modular architecture ensuring scalability and clean code organization, resulting in efficient maintenance and effortless feature expansion.
- Developed a responsive and consistent UI ensuring seamless user experience across all components.
